

Dual-polarized parabolic antenna JRC-29 Deep Dish MIMO is designed for directional links with MIMO mode at the frequency band 5 GHz. The antenna is designed for environments with multiple reflections for long and medium distances in difficult conditions. Its design with deep dish increases isolation among antennas on a mast and increases front to back ratio. The new concept expands the frequency band.

Other models: JRC-29DD-SX MIMO – antenna with stainless steel holder for adverse corrosive conditions

JRC-29DD MIMO Precision – antenna with precision holder JDMW-900 AR

JRC-29DD Pris - antenna for dual-polarized radio UBNT PrismStation
